

## Working program

within Agreement on scientific and cultural cooperation  
between

Taras Shevchenko National University Kiev, Astronomy and Space Physics Department, described shortly below as TSNUK, represented by:

Prof. Makarets M.V., Dean of Faculty of Physics

and

Jagiellonian University in Krakow, Faculty of Physics, Astronomy and Applied Computer Science, described shortly below as JU, represented by:

Prof. dr hab. Andrzej Mania, Vice-Rector for Educational Affairs.

Prof. dr hab. Andrzej Warczak, Dean of the Faculty of Physics, Astronomy and Applied Computer Science.

The Partners establish a student summer internship exchange program between the partners of the agreement. The rules for the program are the following:

1. Each side declares willingness to accept a group of students from the partner institution for a 3 weeks summer internships.
2. The general arrangement for this exchange program is that the partner accepting students for the internship (described below as the host institution) from his partner will provide then training in scientific work by performing individual student research projects supervised by the host institution scientists.
3. The host institution shall foster in finding for the visiting students a simple tourist standard accommodation.
4. Travel and living expenses during the internship will be covered by the students.
5. The obligatory in this program health insurance for a student participating in the internship will be covered by the partner sending the student for the internship, or by the student himself.
6. Detailed arrangements on individual students internship dates and selection of the scientists involved in supervising their project will be arranged directly between students and the respective hosting institute.

7. The working program is valid since the year 2016 without time limit. Completing the program requires a written statement send by one of the Partners.

8. The working program is signed in two copies, a one for each Partner.
